

Merrey Nurlan

Software Developer

merrey.nurlan@gmail.com | nmerrey.github.io | +77071189900

I am a Tech Enthusiast with 2+ years of Web Development experience with Django, Node.js but mostly with Ruby on Rails. I consider myself more of a backender than frontend. Some tech that I am interested to learn in near future are: React, Flutter and maybe something related to ML.

Experience

Samsung | 2020 Sept - Curr.

Worked mainly in 2 directions. Which are coding-lab.kz and making pixel perfect pages for samsung.kz in cooperation with a lot of staff members PM, Web Designers and etc.

Coding-lab.kz

It is an online programming learning platform for teenagers supported by Samsung.

Tech Stack: Django, Postgresql, jQuery.

- Maintaining, optimizing and adding new features to a legacy code. Took responsibility to come up with useful solutions and architectures.
- Added "Live Lessons" feature which made students use our platform way more and made it easier for teachers to gather students for live lessons, also gathering analytical data.
- Added "Attendance Report" feature which made it way easier for teachers to take attendances and analyze progress of students.

Samsung.com

Made pixel perfect pages for marketing department in cooperation with PM, CM and Web Designers.

Tech Stack: HTML/CSS, jQuery.

Coalla.ru | 2020 Aug - Sept. | Part-time

Worked remotely to make main site for coalla.ru.

Tech Stack: Ruby on Rails, Slim, jQuery.

- Integrated backend with already existing front.
- Added new features to Admin dashboard.
- Contributed to frontend.

iSME | tezportal.kz | 2019 Oct - Dec.

Mainly developed and maintained CRM system for sales points. Added new features, optimized and refactored legacy code.

Tech Stack: Node.js, Knex.js, Postgresql, React.js

- Wrote complex SQL queries on PostgreSQL for
- Translated PostgreSQL to Knex.js query
- builder for Node.js server.
- Tackled algorithmic problems everyday.
- Coming up with Analytical solutions

Parakozm.com | 2019 June - Sept.

Worked as a Fullstack Developer for Ed-tech startups. Developed Rails Web applications from ground-up.

Tech Stack: Ruby on Rails, Postgresql, jQuery, Bootstrap, Heroku.

- Worked on 2 projects Blog-Post site and online classrooms for educational institutes.
- Built REST API, Database Structure, MVC from scratch.
- Implemented third party APIs like OmniAuth, iTunes RSS, CKeditor, WebRTC and etc.
- Worked in Agile/Kanban environment using Todoist. Used Github Version Control System

Self employed | 2018 Feb - 2019 May.

Dedicated time for learning new technologies, frameworks and crucial Web Development concepts like REST, MVC, OOP, BDD. Also, build personal projects using Rails. You can check out my portfolio for more info on my projects.

Tech Stack: RoR, Ruby, JavaScript, jQuery, Bootstrap.

- Developed Web Applications like e-commerce and blog-post sites and SPA.
- Built REST API, Database Structure, MVC from scratch.
- Build Web Apps using BDD.
- Worked in Agile/Kanban environment using Trello. Used Github Version Control System

Education

21 Coding School | Kazan, Russia | 2019 March - July

42 Silicon Valley Coding School franchise that is dedicated to sharpen your skills as a programmer. Made my basics such as Data Structure, Algorithms, Unix really solid.

NEXT coding bootcamp | KL, Malaysia | 2018 Feb - Apr.

Best coding school in SEA. My journey as a software developer began here. Learned Rails, Ruby, JS, jQuery, Postgresql and all the basics concepts of Web Development.

Antalya International University | Turkey | 2013-2016

Computer Science Bachelor's Degree.
